Big Irrigation Suit Thrown Out of Court

Court Finds in Favor of Irrigation

Calgary Daily Herald:

A case of great importance to all interested in irrigation in Western Canada was heard before Judge Hyndman, at Calgary, this week. The suit arose out of the contention of Eugene Babcock, who claimed that the land he had purchased from the Canadian Pacific Railway Company as irrigable land was not so benefited by irrigation and appealed to the courts for a revision of his land contract. The land in question is located in the C. P. R. Irrigation Block east of Calgary, and the object of the suit was to have all references to irrigable land removed from the contract and the price reduced to that of non-irrigable land and also to declare void the water agreement whereby the purchaser had agreed to pay an annual water rental of fifty cents an acre.

The case occupied the attention of the court for three days, when Judge Hyndman, without calling any evidence on the Company's behalf, rendered a non-suit and dismissed the case with costs.

This case had been widely advertised among the farmers of the irrigation block and elsewhere by the Farmers' Combined Irrigation and Publicity Committee, as being a test case which would decide once and for all whether or not the Company had misrepresented and mis-stated facts in regard to the suitability of the lands and claims for the development of agriculture by irrigation, and the outcome was looked for with great interest. The whole matter is the result of an agitation by one or two self appointed leaders who had made up their minds to have their own private affairs settled by the majority of the farmers, and who by continual missionary work during the past year or more had succeeded in convincing a number of members in the irrigation block that the company had dealt unfairly with them, and had, in fact, sold them land as irrigable which was not irrigable as a practical business farming proposition.

Mr. Justice Hyndman, in delivering judgment, went fully into the main issue of the case, that the land sold to the plaintiff was unsuitable for irrigation, and that the scheme was of no benefit. His lordship held that a fair trial of the scheme should have been made by experts who would be capable of judging whether irrigation would or would not be a success.

The fact that water was available, said the judge, can be in no way a detriment, as it is simply an argument against the fact that the land was unsuitable for irrigation, and the evidence shows that under irrigation in 1910 the plaintiff secured fourteen bushels to the acre from the irrigated land, as against that not irrigated. The evidence showed that the plaintiff had only done a small amount of irrigation in 1907 and 1910 and that year the witness to the company a letter in which he said that the portion he had irrigated gave "a very good yield to the acre, and the unirrigated portion only six bushels."

It is not on the facts as disclosed by the evidence, but it is possible to come to the conclusion that irrigation is not a benefit to the land.

Dealing with the evidence of W. D. Trago, chairman of the Farmers'

Combined Irrigation and Publicity Committee, and a leading champion of the objections that had been raised against irrigation, the judge said that he regarded him as a prejudiced witness who could not possibly lay claim to know that irrigation on this land was a failure, because there was no test made. On his own showing Trago went among the farmers, urging them not to use water, and he was one of the leaders in the agitation to try and bring about a reduction in the price of these lands and establish the fact that irrigation in this district was a failure.

There was no evidence, said His Lordship, that alkali was due to irrigation anywhere than to rainfall. The land had been irrigated only twice in eight years, and he must hold plaintiff had not made out his case on this issue.

Dealing with the phase of the case involving the regulation, His Lordship reviewed the evidence which showed that plaintiff had continued to hold the land and derive profit from it, growing crops year after year and renting it for two years, without offering any payment of interest or principal to the company after 1910, despite his knowledge of the facts he alleged, and therefore, according to the law, he was barred forever from suing for regulation of the contract because during all the eight years he held the land he took no steps to regulate it, and if he wished to do this he should have taken action at the time he found the statement of the company to be untrue, but he continued acting as though he elected to affirm the contract.

Judgment was, therefore, given for the defendant with costs and the contention for the balance of the purchase price allowed. The result is hailed with much satisfaction by practical irrigators, who have long contended that irrigated districts of Southern Alberta are particularly suited to irrigation. The contention that the alkali is too great or the natural rainfall too heavy, for irrigation to be a success, is disposed of by the fact that successful irrigation operations are carried on in the United States at higher altitudes and in districts of heavier rainfall, and have the full endorsement of the United States Reclamation Service.

Craggier Notes

(From our own correspondent)

The weather is good and all are happy.

Messrs Periville and MacDonald are now plowing on the Dojarid farm.

Mr. Beck had the misfortune to dislocate his wrist and break a bone in his arm last week.

N. Hughes is now running the outfit on the B. H. farm.

Mrs. Grant has returned home much improved in health and all hope she will continue to improve.

J. B. Johansson and G. H. Lavender went to Calgary as witnesses on the big irrigation lawsuit last week, but were not called upon.

Mr. Shaw is very active on the creek and have a bridge over the creek between sec. 9 and 30-14-22.

Gleichen's Wild West Show

June 24th and 25th, 1915

The high success of Gleichen's 1914 Stampede made such an impression on its vast crowd of sightseers and its managers that this season the ranchers and cowboys who played such an important part would not be put down and demanded that another show be put on the boards again this year, promising to outstrip all previous records. Several important meetings were held and things looked so good that the 1915 Stampede project was launched and everybody is working day and night with the idea of a show that will be away in advance of even last year's.

Bill Vye was once asked what he considered the most conspicuous element in the make-up of the Montana Cowboy. He replied, "The art of throwing the rope." Will had lots of sport in him and he could appreciate this kind of thing but since his time the rope has, in the hands of the modern cowboy, taken many more twists and could he have the privilege of sitting beside Chris Bartsch in the grand stand at Gleichen on June 24th and 25th of this present year of our Lord he would see some performances that would make him open his eyes in amazement. The rope throwing will only be a small feature of the performances. Many new stunts will be undertaken and carried through by our home boys and competed for also by a large influx of riders from across the line and many of the celebrated Indian experts from reserves west and south.

Considering the fact that the management have decided that a large proportion of the funds will be set aside as a contribution to the much-needed patriotic work in connection with the war, should have the effect of drawing people as a magnet to visit the Gleichen Stampede.

\$5000 in prizes will attract performers enough to fill up every minute of two days with sport of a high order. Hill's offer of a stall fed bullock to be roasted whole is a new departure. This will be a feast that will be at least new to many of the palefaces who shall have the privilege of joining the circle. It is proposed by the cowboys that the bones of this steer be sold as souvenirs of this the first barbecue held in Gleichen.

Keep all dates registered so as to have an opportunity of visiting the Gleichen Stampede. Last year was the best ever held in the west and this year will far outstrip it in hazardous performances.

Last of 31st Departs

Monday afternoon there was a good crowd of citizens at the depot, despite the fact that many were enjoying the holiday at Langham and Kamaka and the rain coming down in torrents, to see the balance of the 31st Battalion off.

Among those passing through were Privates Frank Vigar and Thos. Woodland of Gleichen who were given a quiet but most feeling send off.

Few people knew that the soldiers were going there who were able to attend the fare, the situation, too keenly to give vent to their feelings in a loud demonstration.

"Frankie" Vigar is the first local boy to leave from Gleichen, he having been born at his father's ranch, Rosebud Creek and naturally all felt an especially keen interest in the young fellow, the more so as his father, mother, sister and brothers were present as well as numerous other relatives to say a fond goodbye and wish him Godspeed and a safe return.

"Tommy" Woodland, was for several years clerk in S. A. Hall's store and was well known by all and besides is betrothed to one

of our fair young daughters. He is also a cousin of Frankie's, his mother being a sister of Mrs. F. C. Vigar. Mr. Vigar has already had a letter from Frankie dated on board train stating that they were getting along well.

Why Not Do It Soon

The Gleichen Football team, having failed to organize this season for the reason that so many have enlisted for the war, Jack Men brings forward a good idea and one that should be upheld. Jack points out that with two men sent up to Calgary last year's football club could be set together and play a match against any team that the soldier boys can bring forth. Now, what everyone good to take a holiday and have a look at the soldiers, and it surely would be appreciated by the boys who have left Gleichen offering their lives for their country.

Letter From a Gleichen Soldier

The CATH has received a letter from Private Al. S. Wood dated "May 15th, on board train, somewhere east of Heron Bay, Ont." It is a semi-private communication that it refers to the K. of P. local lodge of which "Bert" is a member, but as many will be pleased to hear from him it is published almost as written.

Dear Sir and Bro.: I am writing a few lines thinking they may be of interest to you. I will first offer you an apology for using a pencil and for the wretched writing caused by the rocking of the train.

Like the other Gleichen boys in the 31st Battalion I was much disappointed that we did not go through our home town, but no doubt the military authorities knew best which way to send us.

The battalion left Calgary in two sections. The C and D companies leaving about 10:30 a.m. and A and B at 1:30 p.m. on the C. N. R. to Winnipeg. G. T. R. to Fort William and C. P. R. to we don't know where.

The battalion had a good send-off and all along the line the people turned out in great style. The Gleichen boys had a very pleasant surprise at Hanna. A former Gleichen lady in the person of Mrs. Osburn, wife of the manager of the Bank of Commerce, was at the depot to wish us God-speed. This Gleichen neck it was left entirely out in wishing us goodbye. For dinner a roast, vegetables, coffee and porridge. At noon we have a light meal of meat sandwich, crackers and cheese with coffee or tea. For dinner a roast, vegetables, pudding, coffee, bread and butter. Quite an extensive dinner isn't it? Our rifles are packed in cases in the baggage cars and we carry our full kit with us.

The boys have covered the sides with all kinds of writing, such as "Berlin or Brest," "Stony Alberta to Germany," "Wanted a Wife, Widows Accepted," etc., etc.

There are two companies held on board train each evening. We have a string band and the brass band with us. The boys smuggled two of the dogs on board the train were with us at Calgary.

The Y. M. C. A. as always is to the fore trying its best to make the men comfortable and contented. They supply writing material and all reading matter, also games, such as checkers or chess, to pass away the time that hangs pretty heavily on us after being out riding and marching so much.

Our Col. Bell takes a great interest in the boys. He personally went through the train asking the boys if they were able to make the banks and sleep well. He is all man and the boys are all for him. We have a very decent lot of officers all through.

We have to leave the train and do physical drill as well as running every day to keep in form.

You might read the letter at lodge and ask the boys to accept it as a letter to all the brothers.

Victoria Day at Namaka

Henceforth it will be difficult for several hundred people to dissociate Namaka and Empire Day in their memories. For the fourth time that staunch little town has put on a day of sports that towns many times its population might well be envious of.

Namaka folks are nothing if not generous and entertaining at all times, but once a year they allow these fine qualities to run to the extreme and that date is always in memory of the great Mother Queen Victoria, whose memory will ever live in the hearts of all true Britons.

On May 24th of this year Namaka folk were just as ready for having a good time and making everyone else forget their cares and worries and enjoy life as they did in the years gone by when every-bone was prosperous and no one spoke of hard times. There was a fine crowd of visitors both white and red and the sports went off well until about 6 o'clock when the rain set in, and glad as the farmers are to have rain at the time of year many were sorry that the baseball match had to be postponed.

The following is a list of the prize winners:

- Boy's race, 1st prize G. McLean, second Francis Winspear.
- Three-legged race, 1st Red and Yellow, 2nd Blue and Pink.
- Sack race, 1st Yellow, 2nd Harry Red.
- Ladies' race, 1st Squaw, 2nd Grace Gilbert.
- Pole Vault, 1st A. White, 2nd Archie Law.
- Running high jump, 1st A. White, 2nd Edwin.
- 100 yds, 1st Arthur Indian, 2nd Crane Indian.
- Half mile horse race, J. Burnett.
- Half mile Indian horse race, H. Red.
- Half mile pony race, 1st Unwin, 2nd Phillip.
- Half mile flat, J. McLean.
- Girls flat race, Ethel Harwood.
- Girls flat race, Ethel Harwood.
- Miss Dobbins.
- Squaw horse race, Heary Ste.
- The dance held in the I. O. O. F. Hall was a great success and dancing was continued until early Tuesday morning.

Baseball At Langdon Was A Wet Game

Monday the Gleichen baseball team accompanied by a number of rooters motored all the way to Langdon to have a match with the players of that town but unfortunately they had only played one inning each and nicely started on the second when the rain came and the match had to be postponed with Gleichen counting the only score made.

DOUELLETTEVILLE NEWS

(Our own correspondent)

Empire Day in this district passed quietly as most of the people were enjoying a picnic at the river and all report an enjoyable time except the journey home through the rain.

The rains of the past two weeks have made the farmers rejoice as the prospects for a bumper crop were never looked brighter than at present, the grain is coming on fast and quite a number of the farmers are busy breaking with the intention of sowing oats for green feed, so the acreage in this locality this year will be about 25 per cent higher than in former years.

Quite a number of the farmers are preparing to sow alfalfa this year and as they have seen the fine crops that have been grown in the Gleichen district and other parts between here and Calgary, they feel confident that this is one of the best hay crop they can raise, and the lack around here becomes cultivated the alfalfa fields will be extended.

Mr. Chas. Gagnon who has taken up residence in our midst has just received his furniture from his former home in Springfield, Mass. Mr. Bolsalis of the same place has also taken up his residence here. Both of them are greatly pleased with the country and as they are practical farmers and stockmen we are sure they will never regret the move they have made.

Mr. R. O. Sykes, one of our prominent horse-breeder has purchased one of the finest Shire stallions that has been seen for some time. It was bred in Ontario and has been awarded many first prizes at numerous shows. The addition of this animal to the fine stock already owned by Mr. Sykes places them among the finest in Alberta.

Mrs. H. Fairbanks of Calgary, who has been the guest of Mrs. Warren, left for home on Friday.

Mrs. Gibaux has returned from Fraserford (across the Red River) where she has been visiting her daughter, Mrs. Maroli, who has been very poorly for some time, but we are pleased to learn that all danger is past and Mrs. Maroli is able to be around again.

Mr. J. Ball of Gleichen was the guest of Mr. Brough for the week end.

Mr. K. Walters of Namaka spent Sunday with Mr. G. H. Walters.

Mr. H. Cretin, our enterprising blacksmith is kept busy these days. When the farmers want their blacksmithing done right they go to Henry.

HOW THE WOMEN ARE GIVING HELP

A Matter of Initiative—Sustain the Pay
Roll by Purchasing "Made-
in-Canada" Goods

What are the women of Canada doing about the "Made-in-Canada" movement? As usual, more than meets the eye. There never was a good movement without women in it somewhere. When the women of Canada undertake to put their money on the campaign that means prosperity to their husbands, sons and brothers, the success of that campaign is certain. It is in this case that peculiar quality of women known as intuition, counts for more than all the logic of well-constructed arguments. Women are natural economists as well as instinctive spenders. When they endorse a policy of buying goods made by Canadians for the sake of Canadian homes, they do it as a matter of plain instinct. They don't have to reason to a woman that it's her duty to support her own cause before anybody else's. She takes it for granted.

All this movement needed to carry it with flying colors to the winning post of national prosperity was the intuitive backing of the intelligent womanhood of Canada. To them it is as obvious as the sunrise that the disarming opposition, or the tears that compel an enemy. There isn't an intelligent woman in Canada who doesn't stand behind this campaign to boost Canadian prosperity. Any mere man who goes around or hovers about it had better introduce the subject to his wife. One gleam of her intuitive perception will be a match for all his logic and blustering arguments to the contrary. This is no case that divides families. Buying "Made-in-Canada" goods at a time like this is the one call that unites both families and communities.

It isn't a matter of buying silks and bric-a-brac... What keeps the Canadian factory going nowadays is the main part of what you buy every day, and the small items multiplied run into a larger total than the big purchase

WAKE UP, CANADA!

How Toronto Board of Trade is Promoting Prosperity in Canada

The Toronto Board of Trade recently issued a neat pamphlet under the title "Wake Up, Canada—A Method to Keep Business as Usual." This booklet contains official statistics of the imports of foreign goods to Canada during the last fiscal year. Apart from the statistics, however, the booklet contains some sound advice for Canadians generally, a few paragraphs of which we reproduce: Thousands of people in Canada are out of work. If the men and women of this country would buy Canadian-made goods exclusively, Canada would be millions of dollars richer, and all workers would be kept at work. Charity begins at home, and this is not only charity but good business. Let every citizen—man and woman—show true patriotism by promptly receiving to make Canada strong and prosperous by providing work for her sons and daughters.

This can be done, in large part, by the development of every possible Canadian resource, and particularly by demanding Canadian-made products and Canadian-made goods in the course of our daily life.

Buy all over Canada can do much to check the incoming flood of foreign-made goods. Now is the time to remember that every dollar saved to Canada is a dollar earned for Canada. Every manufacturer and merchant should lay down this policy for his purchasing department to-day. This is the first step in the matter. Architects, builders and contractors can, if they will, keep thousands of Canadian workmen employed by specifying Canadian-made materials in their building specifications.

Other professional men can add to their own incomes by ensuring the prosperity of their clients through purchases of home products. Government and municipal authorities all over Canada have it in their hands to divert a tremendous volume of business to Canadian factories, and surely it is as well as well as patriotic to give our own workmen the employment so that they will not be in any way a charge upon the community.

The demand to-morrow all over Canada for Canadian-made goods would change, as if by magic, the present depression into immediate prosperity.

Here, then, is a ready-made, practical, sensible, and profitable way for us, all of us, to make and keep Canada prosperous.

It is practical patriotism to give the preference to goods "Made-in-Canada," and it is practical self-interest as well. Your money stays in Canada—lives up Canadian trade generally—and so helps to create a prosperity in which you share.

DEAL IN STOVES

How One Factory Got an Order—Keeps the Wheels Turning

A statement issued by one of Hamilton's stove manufacturing concerns, illustrates in a striking way the effect of the "Made-in-Canada" campaign which has been running for the last few months. Some time ago the factory was closed for lack of orders. Today it is running four days per week and, and there are reports that it may run six days a week to be long.

"We used to find pretty strong competition from a certain Michigan stove concern," said the manager of the factory referred to, "and largely because there were so many American settlers in the West who had always known the Michigan stove. On the other side, we could't very difficult to get the retailers to stock our line, although our prices were a shade lower than those of the American concern."

"One of our best travellers was on his way back from the West at the time. He ran into an informal clearance of retail hardware men in Regina, and found them discussing ways and means of keeping their business open. He wired us for permission to make them a proposition. We consented and an agreement was reached whereby these men agreed to handle only 'Made-in-Canada' stoves. On the other hand certain makers in the West had to get together and agree to carry these stoves over the hard sledding. The result has been splendid. Sales, retailers and customers have co-operated. As a result of a 'Made-in-Canada' slogan we are able to keep our men employed and our machinery from rusting."

NOTICE

In the matter of the Court of Confirmation of the Tax Enforcement Return of the Town of Gleichen.

Take notice that His Honor Judge Carpenter, Judge of the District Court of the District of Calgary, has appointed the 11th day of June, 1915, for the holding of the Court of Confirmation to confirm the Tax Enforcement Return of the Town of Gleichen.

Buy an Irrigated Farm From The CANADIAN PACIFIC RAILWAY

BECAUSE:

Irrigation makes the farmer independent of rainfall, and insures good crops, not occasionally, but every year. Irrigation makes possible the successful culture of alfalfa, the king of fodders, which insures best returns in dairying and mixed farming.

Irrigation means intensive farming and close settlement, with all the advantages of a densely populated agricultural community.

Irrigation in the Canadian Pacific Railway Irrigation Block is no longer an experiment, the year 1914 having absolutely demonstrated its success wherever intelligently applied.

You can buy irrigated land from the Canadian Pacific Railway at prices ranging from \$30 to \$75 per acre, with twenty years to pay and the privilege of a loan of \$2,000.00 for improvements (8% interest) on principal payment at end of first or second years and no water rental for first year. Assistance is also given in supplying stock in approved instances.

This is the most liberal offer of irrigated farm land on record. Get full particulars from

4. All riders and ropes are required to give assistance when requested to do so by the field manager and all participants are required to take part in the parade, dressed in costumes worn at their performances.
5. The management reserves the right to make any additional rules that circumstances may demand to govern any event.
6. Entries close Wednesday, June 23rd, at 1 o'clock sharp. But entries may be accepted on payment of double entry fee.

Rules Governing Hoping

1. Contestants will rope one steer each day. If a rope is made to tie a steer according to rules he must throw up his hands and take five minutes as his time.
2. Each steer will be given a forty foot start, and each rope is forbidden to start until the rope has crossed the forty foot line and sign given by the starter. The rope may rope the steer any way desired. Catches as catch can.
3. After the rope throws up his hands for his steer he must leave the rope and take five minutes or any way or manner. No shall the rope be permitted to leave his horse behind him when the steer is being passed on. If the rope is within ten feet of the steer and remains there until the judge has passed upon him, the rope will be left down three minutes and tied. Steers will be judged down three minutes from the time the rope throws up his hands. Should a steer get up after the judge has passed on him and before the three minutes are up, the rope will have one minute added to his time.
4. The judge will give to him that three feet are crossed and tied in proper manner to hold steers, steers must be tied with a tie rope.
5. Should any rope who has the first day been disabled or he cannot finish rope the balance of his steers the management will then pick a rope his equal or as near his equal as possible to tie the steer or steers that he has no time on.
6. No roping match can be called a draw, but must be a finish.
7. All ropes entering in this contest must abide by any regulations that the management sees fit to make before contest starts.
8. There will be three time keepers, a tie judge and a starter.

Rucking Horse Riding

1. There shall be three judges and their decision will be final. Riders must ride slick saddle and not ride on spur or change hands. Riders must not change hands on the flank. Spur spawls must be covered with leather and no spur or whip will be allowed. Horses to be ridden with halter and shank.
2. The judge will give to him that three feet are crossed and tied in proper manner to hold steers, steers must be tied with a tie rope.
3. Should any rope who has the first day been disabled or he cannot finish rope the balance of his steers the management will then pick a rope his equal or as near his equal as possible to tie the steer or steers that he has no time on.
4. No roping match can be called a draw, but must be a finish.
5. All ropes entering in this contest must abide by any regulations that the management sees fit to make before contest starts.
6. There will be three time keepers, a tie judge and a starter.

Simply Wonderful For Chest Colds Makes 'Em Well Over Night

Nothing Half So Quick To Relieve and Cure as Good Old "Nerviline"

Don't lie awake tonight coughing, your throat sore—don't let your chest cold develop further—that's the way to coax on pneumonia.

Be sensible, and, as thousands before you have done, use Nerviline. It is a bulky fine fling to knock out a cold or bad cough.

After once using Nerviline you'll swear by it for all time to come.

You'll say it's more like a miracle than anything else to feel its warm soothing action upon your tight chest. You'll be amazed at the quick way it cured your cough and broke up your bad cold.

It's safe for even a child to rub on

Nerviline. Although five times more powerful than most other liniments, yet Nerviline has never yet burned or blistered the tender skin of even a child.

It's worth while to remember that wherever there is an ache or pain Nerviline will cure it.

Try it on your sore muscles, on a stiff joint, on the worst possible case of rheumatism, neuralgia, sciatica, or lumbago. These are ailments Nerviline is guaranteed to cure mighty quick.

The mother of a large family can save heaps of work and worry, can cure little ills before they grow big, can keep the whole family well by always having Nerviline handy on the shelf. This large 50c bottle is the most economical. Trial size, 25c, all dealers, or The Cattarhogue Co., Kingston, Canada.

Half a Million Telephones

One For Every 15 Persons—Only
United States Has as Many in
Proportion

According to the annual report of the Comptroller of Statistics of the Railways and Canal Department, Mr. J. L. Payne, the telephone business of Canada is steadily increasing, while the telegraph shows, for the past year, at least, a decrease in earnings. The telephone business of Canada for the year ending June 30, 1914, showed an increase of more than two and a quarter millions in gross earnings, while the telegraph companies reported a decrease of \$112,000 as compared with 1913.

Gross earnings of the telephone companies last year totalled \$17,297,268, and expenses \$12,882,402, while the net earnings were \$4,414,866. The gross earnings were equal to \$33 per telephone in use. The total number of telephones in use is 521,144, or one for every fifteen of the population. Only one other country, the United States, is known to have as large per capita number of telephones as Canada has.

The gross earnings of the Canadian telegraph companies last year totalled \$5,985,204, with operating expenses of \$4,422,539. The net profits were \$1,742,665 on a capital cost valuation of \$9,255,127. There were 6,150 employees in the telegraph service in 1914, of whom 319 were females.

BABY'S OWN TABLETS USED ELEVEN YEARS

Mrs. McEachern, Glencoe, Ont., writes: "I have used Baby's Own Tablets for the past eleven years for my children and have every reason to praise them as they always do good." Once a mother uses the Tablets for her little ones she will use no other medicine. They are absolutely safe, pleasant to take and never fail to regulate the bowels and stomach. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Farm Hand's Wages

According to a bulletin recently issued by the Dominion Census and Statistics branch, Ottawa, the average wages, including board, paid to farm hands in Canada during last summer were: \$35.55 for males and \$18.81 for female help. For the year including board, the average wages were \$33.30 for males and \$18.35 for females, whilst the average cost of board per month works out to \$14.27 for males and \$11.20 for females as compared with \$12.49 and \$9.53 in 1910.

Average wages per month in 1914 were lowest in Prince Edward Island, viz. \$24.71 for males and \$14.48 for females. In the Western Provinces they were for males \$39.13 in Manitoba, \$40.51 in Saskatchewan and \$40.26 in Alberta, females receiving \$22.35 in Manitoba, \$22.96 in Saskatchewan and \$23.64 in Alberta.

"The fighting in Belgium was child's play with what I went through during the Crimean war," said a veteran to one of Kitchener's recruits.

"I suppose you had some exciting experiences," replied the recruit.

"Well, I should say so. My regiment was ordered to charge a fort. We dashed amid a storm of grape and caustic into the very midst of the enemy, and not a man escaped to tell the tale. Every man from the colonel to the drummer boy was killed."

"How did you manage to escape?"

"Well, you see, I was at home on furlough at the time."

Reilly—I hear Pat Dolan was drowned yesterday.

Fitzpatrick—Couldn't he swim?

Reilly—Yes, but he was a union man. He swam for eight hours and then quit.

Cured Fifteen Years Ago of Piles and Eczema

By Using Dr. Chase's Ointment—Certifies That the Cure
Was Permanent.

Some people have tried so many doctors and so many treatments in their search for cure for piles and eczema that they find it difficult to believe there is an actual cure.

The strong point about Dr. Chase's Ointment is that it not only brings relief promptly, but brings about actual and lasting cure.

In 1897 Mr. Ketcheson, 88 Doro street, Peterborough, Ont., wrote as follows:—"I was troubled for thirty years with itching piles and eczema. I could not sleep at night, and when I got warm the itching was terrible. Eczema covered my legs down to the knees, perfectly raw. I have tried

every preparation I could hear of, using Dr. Chase's Ointment advertised. I procured a box, and this Ointment effected a complete cure."

On Sept. 28, 1912, Mr. Ketcheson wrote as follows:—"I received a letter from you to-day, saying that you found on file a statement made by me 15 years ago. I have always given Dr. Chase's Ointment a good name since it cured me, and shall tell you how I came to use it."

"I had suffered for many years from eczema and piles, and had tried doctors and everything I could hear of in vain. Reading about Dr. Chase's Ointment, I purchased it at once, and was soon completely cured. That was fifteen years ago, so there can be no doubt of the cure being a permanent one. I have met a great many people who have been cured by Dr. Chase's Ointment."

Demurrage Charges

Michigan Central Railroad Mulcted
With Heavy Fine For Failing to
Collect Charges

The close supervision exercised by the Interstate Commerce Commission over the United States railroads is illustrated by the heavy fine imposed yesterday by the federal courts on the Michigan Central Railroad for \$24,000 for failing to collect demurrage charges from the National Fireproofing Company. In the case of these demurrage charges the unfortunate railway is sometimes between the devil and the deep sea; for the shipper, particularly the large shipper, is often slow in paying, whereas the demurrage commission, suspecting a concealed rebate, is ever threatening punishment. A fine such as the one just imposed will probably force the railroads to insist on prompt collections, and the Canadian Board of Railway Commissioners may follow suit. Shippers who have been storing their goods on freight cars at the railroad's expense will then no longer be able to escape payment by putting up excuses or playing on the fact that they are good customers of the railroad.—Editorial from the Gazette, March 26th, 1915.

Carried Chum to Safety

For a week, as they lay in the trenches, the last King's Liverpool were troubled from sniping from trees, and especially from a house were troubled with sniping from about 250 yards distant. "Determined to silence the snipers, the officers commanding our company," says Pte. S. King, "chose from a number of volunteers for the task three men who just before dawn left the trench for the house. They must have made things bad for the enemy, for a couple of shells were planted into the house, though without harming our three heroes, who had to run back to our trenches. The first man got back, but the second was bowled over by now it was halting lead from the Germans' trench. The last to leave was a man named Pte. Geary. He ran, and coming across his chum he coolly bent down, picked him up, and safely brought him back to our lines."

Doing Wonders For Rheumatism

WHAT PETER F. PATTERSON
SAYS OF DODD'S KIDNEY
PILLS

Gaspé Co. Man Gives Advice to All
Who Want to be Cured of
Kidney Troubles

Haldimand, Gaspé Co., Que.—Specialist—"I have just opened the third box of Dodd's Kidney Pills and find they are doing me wonders of good for the kidneys and rheumatism," so says Mr. Peter F. Patterson, a well known resident of this place.

"My troubles came through a cold and strain," Mr. Patterson continues, "and I suffered for many years. I had headache, backache and rheumatism. My sleep was broken and unrefreshing. I had a bitter taste in my mouth in the morning and I perspired freely with the slightest exertion. I was often dizzy; I was troubled with heart flutterings. I was nervous and my skin itched and burned at night."

"After using Dodd's Kidney Pills I recommend them to anyone who wants to be cured of kidney troubles. Everyone of Mr. Patterson's ailments was a symptom of kidney disease. That's why he found such prompt relief in Dodd's Kidney Pills. They only cure kidney disease."

Dr. Burton and Dr. Gage were ministers and friends. Dr. Gage had been lecturing on his travels, and one of his lectures—on Palestine—had been thought not so interesting as the others. On its second delivery many of the auditors withdrew. Dr. Gage's house was soon afterward entered by a burglar. Dr. Gage was giving Dr. Burton an account of it. "Why, doctor," he said, "I had him down flat on his back. I held him there. He couldn't move an inch." "Good," said Burton. "Now what a splendid opportunity that was to have delivered to him your lecture on Palestine."

Canada's Gift For Belgian Relief

Canada has contributed \$2,000,000 worth of food and clothing for relief in Belgium. It was announced in New York by the commission for relief in Belgium, which has received a report to that effect from Hector Phillips, director of the relief work for the victims of the war in Belgium.

Nova Scotia leads all other provinces in the size of its contributions. It was in a small southwestern town that the town council, which we interviewed, is becoming unduly delicate, caused this notice to appear in the local newspaper when a tax on dogs was imposed:

"Tax on each dog, male, one dollar; vice versa, three dollars."

Minard's Liniment Relieves Neuralgia

"Who is that lad dressed in black, mother?" asked Bobby, as he sat with his mother in a train.

"That is a Sister of Charity, my boy," replied his mother.

Bobby pondered deeply for a moment, and then he said: "Which is she, mother, Faith or Hope?"

Mr. Andrew Carnegie, who last summer took one of his farms at Skibo into his own hands, is now seeking a tenant for it. His future relations with Skibo are rather uncertain. For the coming summer, autumn, he and Mrs. Carnegie have taken the Vanderbilt's estate at Bar Harbor, in Maine. Since the breakdown of his peace plans, Carnegie's popularity in Great Britain has declined greatly.

Richard Jordan Gatling, the inventor of the gun bearing his name, was a native of Hertford county, N.C., where he was born in 1818. The Gatling gun was not used to any extent during the war between the States, a dozen or so being employed by Butler on the James river. The invention was not made fairly practical until 1865, when the gun was adopted into the United States service.

Secretary of Agriculture

David F. Houston is Now Uncle
Sam's Farmer-in-Chief

Farmer-in-chief of the world's richest agricultural country is the proud position of Dr. David Franklin Houston, who was awarded the portfolio of Secretary of Agriculture when President Wilson passed around his cabinet plums. Mr. Houston, who is in his 50th year, is a "Tar Heel" by birth, but a "Show Me" by adoption. In other words, he was born in North Carolina, at Monroe, but later transferred his allegiance to Missouri. His appointment to the post which had been held for sixteen years, under three presidents, by James Wilson, came somewhat as a surprise, as Mr. Houston was an educator by profession and had never taken a prominent part in politics.

The man who heads the government department entrusted with the conservation of the republic's food most industry, gained his first knowledge of agriculture by toiling on a farm in North Carolina. He completed his education at South Carolina College and at Harvard, where he took his A.M. degree in 1892. He specialized in ancient languages, and became a tutor of the deceased, tongues at South Carolina college. He was superintendent of schools at Spartanburg, S.C., for three years, earning the money to enable him to take the political science course at Harvard. Twenty years ago he joined the faculty of the University of Texas at Austin, where he was professor of political science and dean of the faculty.

It was while he was connected with the Texas institution that he married Miss Helen Beall. In 1902 he was offered the presidency of the Agricultural and Mechanical College of Texas, where he resumed his youthful study of farming processes. It was probably the knowledge he gained while at the head of that college that resulted in his appointment to a job in the cabinet of President Wilson. In 1905 Mr. Houston returned to the University of Texas, this time as president. He remained there until 1908, when he became chancellor of Washington University at St. Louis, the position he held when he was called to Washington to become Uncle Sam's farmer-in-chief. There he proceeded to make good, but, being a quiet man with no yearning for the limelight, his achievements have not gained much publicity.—Minneapolis Journal.

General Sir Archibald Hunter, commander of the British Third New Army, is immensely popular in the service on account of his large fund of good stories of regimental life.

One of his best concerns a certain "Tommy" who was more noted for his wit than his scholarship. The man's grammar and spelling were simply awful, and Sir Archibald, who was quite a young officer at the time, was always trying to teach him the King's English.

"I don't believe you know what w-o-m-a-n spells," said the future general to the uneducated one on one occasion.

"Trouble, as a rule, sir," replied "Tommy," with a grin.

Hunter was so amused that he was quite unable to reprimand the man for his "cheek."

"Begin at the bottom and work up, Patrick; that is the only way."

"It cannot be done in my business. I'm a wall digger."

To the Merit of Lydia E. Pinkham's Vegetable Compound during Change of Life.

Westbrook, Me.—"I was passing through the Change of Life and had pains in my back and side and was so weak I could hardly do my housework. I have taken Lydia E. Pinkham's Vegetable Compound and it has done me a lot of good. I will recommend your medicine to my friends and give you permission to publish my testimonial."

—Mrs. LAWRENCE MARTIN, 12 King St., Westbrook, Maine.

Manston, Wis.—"At the Change of Life I suffered with pains in my back and loins until I could not stand. I also had night-sweats so that the sheets would be wet. I tried other medicine but got no relief. After taking one bottle of Lydia E. Pinkham's Vegetable Compound I began to improve and I continued its use for six months. The pains left me, the night-sweats and hot flashes grew less, and in one year I was a different woman. I know I have to thank you for my continued good health ever since."

—Mrs. M. J. BROWNELL, Manston, Wis.

The success of Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, is unparalleled in such cases.

Save the Oats From Smut

Quebec Farmers Lost Last Year From
This Cause \$1,300,000

In 1913 the area devoted to oats in the province of Quebec was 1,303,000 acres, which yielded 39,000,000 bushels, valued at \$18,732,000. The average percentage of smut in oats given by Mr. T. H. Gussow, Dominion Botanist, Ottawa, is over 7 per cent. Taking this loss (7 per cent.) as a basis for Quebec, the total money loss due to smut in oats in 1913 was \$1,311,240. It is very probable that the loss in 1914 was even more severe than that of the year before.

A loss of one million three hundred and eleven thousand dollars is a heavy penalty the farmers of Quebec are paying every year for neglect of treating their seed oats with formalin solution. The treatment is so simple and cheap that there is no good reason why every farmer should not practice it.

Smut is a fungus plant which causes a characteristic disease of oats, wheat, barley and other grains, affecting the grain in the head and sometimes the chaff as well. The smut of oats does not injure wheat or barley, similarly the smut of wheat does not injure oats or barley, and the smut of barley does not injure wheat or oats.

About harvest time smut disease is observed in infested grain crops. At that time the diseased heads become sooty colored on account of the production of thousands of minute bodies called spores. In the field these spores are carried away by the wind to uninfested heads, and at threshing time they are so thoroughly scattered that it is impossible to find a grain which does not have several spores attached to it, although invisible to the naked eye.

When this grain is planted the adherent spores sprout at the same time as the grains themselves; the sprout tubes of the smut enter the tender seedlings of the grain, grow up within their lengthening shoots and enter the forming grain, soon destroying it.

Smut may be prevented by sprinkling seed oats and wheat with a solution of formalin (formaldehyde) a few days before sowing time. Care should be taken that the best grade of formalin, the forty per cent. formaldehyde, is used, for very low grades are on the market. It is a liquid and comes in pound bottles. One bottle when diluted with 40 gallons of water is sufficient to treat from 35 to 40 bushels of grain, thus making the cost of treatment about 1 per cent. per bushel.

A day or two before the oats are ready for sowing they should be piled in a heap on a clean barn floor, and the pound of formalin poured into a barrel containing 40 gallons of water. With a broom or sprinkling can the solution should be sprinkled on the grain, at the same time the grain is shovelled over and over until every grain is wet. The pile of wet grain should be left for two or three hours, then covered with clean sacks for five or six hours or over night. After this the grain should be spread out to dry. In order to avoid recontamination of the treated seed before sowing, it is advisable to dip the bags or sacks in the barrel of formalin solution while the grain is being treated, and allowed to dry. Grain thus treated but not required for seed is perfectly safe to use for feed.

1.—Buy the supply of formalin early so as to have it on hand at seeding time. Two pound-bottles will treat 75 bushels of oats.

2.—Be sure and buy the best grade of formalin (40 per cent. formaldehyde); accept no substitute.

3.—As treated grain swells slightly the seed drill gauges should be so adjusted as to allow for an additional 1/4 or 1/2 bushel per acre.

4.—The bags which are to hold the treated grain should be treated by being dipped in the formalin solution and spread out to dry.

5.—All the seed oats should be treated whether they appear smutty or not.—Quebec Journal of Agriculture.

Absinthe Drinking

Absinthe drinking, now permanently banned in France, came home with the French soldiers from the Algerian war (1844 to 1847). The green devil soon pushed its way across the channel, for by 1854, when "The Newcomer" was written, it was a familiar drink in West End clubs. When Barnes seats himself by the window at Bay's and gazes to Sir Thomas de Boots and Charley Heavyside, he orders "an absinthe and water" to recuperate from the fatigue of a day's toil in the city.—Pall Mall Gazette.

A Kansas farmer, a Dane, applied for naturalization papers. The judge asked him, "Are you satisfied with the general conditions of the country?"

"Yes," drawled the Dane.

"Does the government suit you?" queried the judge.

"Yes, yes; only I would like to see more rain," replied the farmer.

Two Lancashire boys were expatiating on the relative merits of their fathers as musicians.

"My father is the greatest musician in the town," said one.

"Oh," the other said, "when my father starts every man stops work."

"How's that?" said the other.

"What does he do?"

"He blows the whistle for meals up at the mill."

Buddhist and Christian Sects

Statistics show that in Japan there are 13 denominations and 57 sects of Buddhism. Of these the most powerful one is that of Shin Shu. There are 71,769 temples and 53,081 priests. This number includes only residing priests. Counting all those engaged in preaching and teaching there are 73,047. There are also other kinds of priests and nuns who have done duties of either preaching or teaching. These number 54,001. These classes of priests and nuns make up in all 10,000 students preparing for the priesthood. The home department of the Japanese government has been gathering statistics of Christians for many years, and the last report of the number of believers of the different churches is as follows: Roman Catholic, 63,081; Greek Catholic, 14,749; Nippon Kirisuto, 18,441; Kumiai, 16,115; Sei Ko Kwai, 15,090; Methodists, 11,763; Baptists, 4,191; other smaller denominations, 12,246; total, 1,555,676.

French Have a New Explosive Terrible in its Effect

Ever since the beginning of the war there have been rumors of a new French explosive of appalling force. A recent statement referred to the expected increase in results from artillery fire consequent upon some discovery, and the Paris Eclair prints an extract from a soldier's letter, saying:

"We had three trenches to take, and expected a hard job. The air seemed on fire. The signal was given and we charged, but the usual hail of bullets was lacking."

"Back to the Land"

There are now living in cities many men with failed families who have had experience in truck farming, and who are paying as much as \$200 per year rental for a house and small lot. An equally good home, with twenty acres of land suitable for truck farming, might be had in the country at lower rental and be quite capable of yielding even larger net returns for the family than would the city occupations, remarks a bulletin issued by the Seed Branch, Ottawa.

The door bell rang and the mother, was not yet dressed. The little girl sought to engage her in conversation.

"How is your little boy?" she asked.

"Why," replied the lady, "I have not got any little boy."

"No little boy? Well—how is your little girl?"

"But I have no little girl either."

"Well," persisted the child, nonplussed, "what are yours?"
